

ABOUT GP&E

Your home for Underground Power and Cable Hauling solutions in Victoria.

Gippsland Plant and Electrical have been in operation since 1991, specialising in trenching, installing pits, conduits, light poles, electrical for new subdivisions and for power upgrades.

Since 2020 GPE has been completely independent and has moved away from simply doing electrical installation and street lighting and expanded into civil construction and cable jointing. Whether you're seeking underground power installation, an upgrade to existing infrastructure, cable hauling, or other civil construction services in Victoria, your project will be handled with care from start to finish.

CORE COMPETENCIES

We at GP&E engage our own employees to perform all site tasks where possible but will utilise subcontractors of high standards when necessary, ensuring our quality and workmanship is not compromised.
